Work Experience

Coopdigity Inc. - Marysville, CA. June 2017 - July 2018
- Integrate, test, and document code changes in collaboration with team using Git and
  Agile methodology to maximize developmental efficiency.
- Developed Javascript and C# scripts to translate data between applications with SQL.
- Developed web apps in Angularjs, Nodejs and ASP.NET.
- Design web pages with HTML5, CSS, and Bootstrap while tailoring UI/UX for easy and
  attractive user experience.
- Query data dynamically with page inputs for greatest control of user data perspective.
- Create CRM appointments scheduler with calendar and google maps route planning so
  salespeople can create and edit appointments and plan their route all in one place.

American Building Supply - Sacramento CA. Sept 2018 - June 2019
- Designed and implemented feature changes to PHP and Javascript web pages.
- Refactored legacy web pages to have mobile friendly CSS styling.
- Worked with end users to add changes to Microsoft access forms.
- Worked with legacy unix command line based ERP software to manage company wide
  users and roles, database, and reports.
- Created Autohotkey scripts for loading data into above ERP software.
